Michael

Thank you for going and also for the summary of the meeting. I'm glad to hear that the public meeting went well and that we're making progress toward cleaning up this facility. It's good to see our teams working together on this.

Thanks
Ed

Good Morning Ed,
I wanted to let you know that the two public meetings went well. Our team did a good job presenting information to the public and emphasized our ongoing coordination with Wisconsin Department of Natural Resources and other governmental agencies.

The community near the St. Francis facility expressed the need for a "sampling strategy" for future sampling events around this facility. Here are a couple of clips from the meetings. Please let me know if you have any questions. Thank you.
